AA : GENERAL SERVICES

AA-001

Docking / undocking

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-001-01	Shipyards Supply Costs	0.00	DAY	No

Short Description :

Dockage for the first & Last day in the dock(2 days)

Long Description :

The dock rent for the first and the last day in the yard to be quoted.

The basis of calculation of the days (Either basis 24 hours/Calendar days) should be clearly specified.

Pilots/Tugs/line handlers should be specified in appropriate section .

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-001-02	Shipyards Supply Costs	0.00	DAY	No

Short Description :

Quote for the subsequent estimated days in the yard

Long Description :

The cost for the subsequent days in the dock to be quoted.

Basis for the calculation of the number of days to be clearly specified(24 hrs/calendar)

AA-002

Dock block removal and erection of temporary support

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-002-02	Shipyards Supply Costs		PCS	No

Short Description :

Remove & restore side blocks per block

Long Description :

Quote for the cost to remove of side block for examination in way of side/Bilge strake plating.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-002-03	Shipyards Supply Costs		1	No

Short Description :

Removal of the Keel Block

Long Description :

Quote for the cost to remove Keel block for examination in way of keel strake plating.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-002-04	Shipyards Supply Costs		1	No

Short Description :

Erection of Crib /Poppet for temporary support

Long Description :

Quote for temporary erection of the Crib/Poppet where required because of extensive block removals

AA-003

Wharf dues per day

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-003-01	Shipyards Supply Costs		DAY	No

Short Description :

Wharf dues /day

	Long Description : <i>Quote for the wharfage (berth) charge as necessary to accomplish work.</i> <i>Number of days based on length of stay in yard.</i>
--	--

AA-004

Gangway

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-004-01	Shipyard Supply Costs		SET/TIME	No

Short Description :

Erecting & removing gangway

Long Description :

Gangway to be installed as required by Yard regulation/local authorities.

The gangway(s) should be rigged as close as possible to the vessel accommodation in a safe way with safety net underneath.

Gangway should be well lit during dark hours.

Passageway between shore, deck and the vessel accommodation shall be kept clear from hoses,cables or other obstructions.

Any railing removed/cut to facilitate placing of the gangway to be fitted back prior vessel departure from the yard.

AA-005

Pilotage, Tugs and Linehandlers

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-005-01	Shipyard Supply Costs		per shifting	No

Short Description :

Mooring/Unmooring at the yard-Pilot Costs.

Long Description :

Quote for below services for assisting the vessel shifting operations as may be required.

The services of a qualified pilot.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-005-02	Shipyard Supply Costs		Per Shifting	No

Short Description :

Mooring/Unmooring at the yard-Tug Costs

Long Description :

Quote for the Tugs for each shift.

If any deviation in cost due to mooring outside working hours/holidays should be clearly specified.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-005-03	Shipyard Supply Costs		Per Shifting	No

Short Description :

Mooring/Unmooring at the yard-Line Handlers Costs.

Long Description :

Quote for the Line Handlers required for each shifting.

If any deviation in cost due to mooring outside working hours/holidays should be clearly specified.

AA-006	Filling of Ballast Water
---------------	---------------------------------

	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	AA-006-02	Shipyard Supply Costs		Per ton	No
Short Description : Filling of ballast water Long Description : <i>Ballast water to be filled as per the vessel requirement.</i> <i>Estimated quantity to be filled up will be based on vessel stability requirement inside the dock.</i>					
	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	AA-006-03	Shipyard Supply Costs		Per Connexion	No
Short Description : Line connexion/disconnexion. Long Description : <i>The number of times the connexion/disconnexion done will be based on the number of tanks to be filled up.</i> <i>Removal/refit the vent heads to be included in the cost.</i>					
	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	AA-006-04	Shipyard Supply Costs		per ton	No
Short Description : Deballasting using yard's pump Long Description : <i>Quote for providing the service of yard's pump to deballast in the dock.</i> <i>This should be basis per ton of water deballasted.</i>					

AA-007	Plugs removal / refit				
	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	AA-007-01	Shipyard Supply Costs		Pcs	No
Short Description : Bottom plug unit removal/ refitting / vacuum testing Long Description : <i>Plugs to be removed only if required by vessel supdt.</i> <i>Allow for removal, refitting and vacuum testing/cementing.</i> <i>This will be witnessed by ship's officer and plugs will be in the custody of Chief officer.</i> <i>No plugs are to be removed from tanks containing fuel/lubricating oil unless specifically required and this to be carefully checked and recorded.</i> <i>Vacuum testing of all the plugs to be carried out in the presence of ship officer.</i> <i>After the successful completion of the vacuum test, this should be covered up with cement.</i>					

AA-008	Disposal of Water / Oily Water / sludge				
	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	AA-008-01	Shipyard Supply Costs		Ton	No
Short Description : Disposal of water Long Description : <i>Quote for the disposal of water/ton which may be required to be removed from the E/R, tanks, boiler etc.</i>					

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-008-02	Shipyard Supply Costs		Ton	No

Short Description :

Disposal of Oily bilge water

Long Description :

Quote for the disposal of water/ton which may be required to be removed from the E/R, Pump room tanks, boiler etc.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-008-03	Shipyard Supply Costs		Ton	No

Short Description :

Disposal of oily sludge

Long Description :

Quote for the disposal of oily sludge generated in the E/R.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-008-04	Shipyard Supply Costs		Line/ Times	No

Short Description :

Connexion/Disconnection for the disposal

Long Description :

Quote for the connexion/disconnection for the disposal using ships pumps.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-008-05	Shipyard Supply Costs		Per ton	No

Short Description :

Disposal of Oily bilge water/sludge using yard pump

Long Description :

Quote for the disposal/ton using yard pump.

This should include connection/disconnection and the transportation of the equipment.

AA-009

Electric Power afloat & in dry-dock

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-009-01	Shipyard Supply Costs		KWH	No

Short Description :

Supply of power per KWH. Allow for 3000 KwHs/day.

Long Description :

For estimate purpose, the item prices are to be based on electricity consumption as indicated(3000 KWHs /day).

The final price will be adjusted to the actual consumption as verified by the meters reading.

The meter reading to be verified by ships electrician on each connection and disconnection.

Time of connection/disconnection to be recorded and the meter reading to be reported daily at the management/safety meeting by the yard verified by ship's electrician.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-009-02	Shipyard Supply Costs		Each time	No

Short Description :

Connection/disconnection /time.

Long Description :

The shore power requirement is while the vessel is in the dry dock however it may be required while alongside the yard berth.

Each connection/disconnection should be recorded by yard electrician and ship's electrician should be advised accordingly.

	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	AA-009-03	Shipyards Supply Costs		DAY	No
Short Description : Rental for frequency converter Long Description : <i>In case of requirement of the frequency convertor, the rental charge/day should be quoted.</i>					

AA-010 Heating Lamps

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-010-01	Shipyards Supply Costs		per lamp/day	No

Short Description :

Heating lamps per lamp per day.

Long Description :

*Heating lamps required on the electrical motors and generators.
Based on the ship staff requirement ,the lamps to be supplied by yard.*

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-010-02	Shipyards Supply Costs		set/time	No

Short Description :

Price per connection/disconnection per lamp.

Long Description :

Quote for the installing and removing of heating lamps during the agreed period between the yard and vessel supdt.

AA-011 Temporary lighting

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-011-01	Shipyards Supply Costs		Per day	No

Short Description :

Quote unit cost per lightening per day.

Long Description :

Yard to provide additional cables with lights as requested by vessel supdt to spaces as needed by vessel 's crew or owners contractor during the repair period.

Note: All temporary lightings required in the course of repair undertaken by yard to be yard's responsibility.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-011-02	Shipyards Supply Costs			No

Short Description :

Price per connection/disconnection per light

Long Description :

Quote for the installing and removing of light during the agreed period between the yard and vessel supdt.

AA-012 Telephone service

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-012-01	Shipyards Supply Costs		line/time	No

Short Description :

Connection /Disconnection.

Long Description : <i>price for connection/disconnection to be quoted.</i>				
Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-012-02	Shipyard Supply Costs		DAY	No
Short Description : Shore telephone (Yard's Internal Calls)				
Long Description : <i>To provide telephones on board at Ship's office for ship to shore communication while the vessel is in the yard. A list of all emergency and repair managers phone numbers shall be posted near the phone .</i>				
<i>Note: No international calls should be allowed on the telephone.</i>				

AA-013 Fire watchmen

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-013-01	Shipyard Supply Costs		man/day	No

Short Description :

Fire watchmen Service

Long Description :

Furnish Fire watchman service during the entire period the vessel is undergoing repairs, while afloat at the Yard berth/pier and while the vessel is in dry dock as required by the shipyard regulations and Port authorities.

Note: When Fire Watch is required to standby while hot work is in progress, this is to be included in the price .

Indicate as per below;

- a. Number of watchmen required per shift.*
- b. Cost per day/man*
- c. For calculation purpose assume 2 Fire watchman each shift.*

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-013-02	Shipyard Supply Costs		man/day	No

Short Description :

Security watchman service

Long Description :

Furnish Security watchman service during the entire period the vessel is undergoing repairs, while afloat at the Yard berth/pier and while the vessel is in dry dock as required by the shipyard regulations and Port authorities.

Indicate as per below;

- a. Number of watchmen required per shift.*
- b. Cost per day/man*
- c. For calculation purpose assume 1 security watchman each shift.*

AA-014 Fire line

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-014-01	Shipyard Supply Costs		LINE/DAY	No

Short Description :

Fire lines

Long Description :

To arrange Fire hoses to vessel on deck, pump room & Engine room during the entire period while the vessel is undergoing repairs.

Fire hoses to be kept under water pressure of 5 Bar to the 65 mm hoses.

2 separate connexions to be made. One for Engine room Fire connexion and other to main deck fire system.

Quote as per below;

a. Cost/day for each line

b. Cost for the entire period for 2 lines.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-014-02	Shipyard Supply Costs		Per Time	No

Short Description :

Fire Line connect/disconnect.

Long Description :

Quote for Line Connection/disconnection Fire hoses each time.

For estimate purposes allow for 6 connect/disconnect during the entire period.

AA-015 Cooling water for A/C plant & Provision refrigerating plant

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-015-01	Shipyard Supply Costs		Line Per Time	No

Short Description :

Cooling water Lines

Long Description :

To provide and maintain supply of cooling water at adequate pressure to;

1. Air conditioning system

2. Domestic reefer system

3. Engine control room air conditioning system.

Pressure should be maintained between 2 to 2.5 bar.

a. Quote for unit price per line/day

b. Allow for 3 lines (3 Inlet & 3 Outlets) during the entire docking period.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-015-02	Shipyard Supply Costs		Line/Day	No

Short Description :

Cooling water lines Connection/Disconnection

Long Description :

Quote for Line Connection/disconnection Cooling water hoses each time.

For estimate purposes allow for 6 connect/disconnect during the entire period.

AA-016 Fresh Water supply

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-016-01	Shipyard Supply Costs		Ton	No

Short Description :

Fresh Water supply

Long Description :

To make necessary connection and supply fresh water to vessel's fresh water tank for domestic purpose at the request of the superintendent.

1. Quote for unit price/ton
2. Allow for supply of 500 MT for estimate purpose.

Note: Meter reading to be verified by the ship's officer

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-016-02	Shipyard Supply Costs		Line/Time	No

Short Description :

Fresh water line Connection/disconnection/time

Long Description :

Quote for Line Connection/disconnection water hoses each time.

For estimate purposes allow for 1 connect/disconnect during the entire period.

AA-017 Compressed air

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-017-01	Shipyard Supply Costs		Line/Time	No

Short Description :

Compressed air Supply

Long Description :

Yard to provide compressed air manifolds on deck and engine room for general use and ship 's maintenance work.

Air pressure to be maintained at 7 bar.

Air supply to be provided at the specific instructions from the superintendent.

1. Cost per manifold/day
2. Allow for 2 manifold during the entire period in the yard.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-017-02	Shipyard Supply Costs		Line/Day	No

Short Description :

Price per connection/Disconnection

Long Description :

Quote for Line Connection/disconnection of manifold each time.

For estimate purposes allow for 2 connect/disconnect during the entire period.

AA-018 Crane service

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-018-01	Shipyard Supply Costs		Hour	No

Short Description :

Crane service for ship purpose

Long Description :

To provide shore crane with riggers to handle loading/unloading of vessel's stores, provisions , spares and miscellaneous equipment.

This crane use will not interfere with regular shipyard routine.

1. Quote for Unit price per hour.

2. Allow 10 hours usage for estimation purpose.

Note: A daily statement of crane hours used for ship's purpose only must be handed over to the vessel superintendent.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-018-02	Shipyard Supply Costs		Hour	No

Short Description :

Floating crane

Long Description :

Quote for the floating crane if required by the vessel.

Quote per hour basis. Only for estimation

AA-019 Garbage removal

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-019-01	Shipyard Supply Costs		DAY	No

Short Description :

Garbage removal

Long Description :

Furnish Labour and material to remove household garbage from the vessel daily for health protection.

The yard has to supply a bin with cover for the garbage.

Certificate for the garbage and plastic disposal to be submitted at the end of the repair period.

Quote for the cost each time garbage removal.....

Cost for the total repair period.....

AA-020 Alleyway protection covering

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
AA-020-01	Shipyard Supply Costs		Lumpsum	No

Short Description :

Alleyway protection covering

Long Description :

To avoid dirtying the accommodation and alleyways where the shipyard employees have to walk for access to the repair areas, all passageways, ship office, officer and crew mess rooms, cargo control room and engine control room is to be temporarily covered with cardboard paper, heavy duty polythene sheet or other suitable material.

During repair period ,any damage sheeting to be replaced accordingly.

On completion of the all repair works all coverings to be removed, disposed and areas to be cleaned up.

1. Quote per sq. meter.

2. Total cost based on total Boot Top area. (400 m2)

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
BB-017-03	Shipyards Supply Costs		sq.mtr	No

Short Description :

Spot SA1/ Power tooling for paint repair.(Intercept 7000 RED)

Long Description :

Boot Top Area.....400.....m2

estimated area: 100 square meters.

The mechanically damaged area should be power tooled light wire brush / Needled scalar should be used. The power tooling areas to be squared off.

The grit blasting should be fully avoided as the paint is silicone pain.

yard to quote for labor, material, power tooling, staging, lighting, ventilation for the job

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
BB-017-04	Shipyards Supply Costs		sq.mtr	No

Short Description :

Touch up coat -1 (Intershield 300 Aluminum). 1st Primer

Long Description :

1. Quote for the Touch up coat per sq. meter.

2. Allow for 15% of the area for the estimation purpose

First touch-up coat of primer at 125 microns DFT (Intershield 300 Aluminum). Airless Spray

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
BB-017-05	Shipyards Supply Costs		sq.mtr	No

Short Description :

Touch up coat -2 (Intershield 300 Bronze). 2nd Primer

Long Description :

1. Quote for the Touch up coat per sq. meter.

2. Allow for 15% of the area for the estimation purpose

First touch-up coat of primer at 125 microns DFT (Intershield 300 Aluminum). Airless Spray

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
BB-017-06	Shipyards Supply Costs		sq.mtr	No

Short Description :

Touch up coat-2 (Intergard 263 Light Grey). 3rd Primer

Long Description :

1. Quote for the Touch up coat per sq. meter.

2. Allow for 15% of the area for the estimation purpose

One full coat of primer anti-corrosive at 75 microns DFT to the damaged areas. (Intergard 263 Light Grey). Airless Spray

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
BB-017-07	Shipyard Supply Costs		sq.mtr	No

Short Description :

T/U Affected areas and Power tooled areas with Intercept 7000 (RED)

Long Description :

Yard to quote for T/U with 150 DFT airless spray for the affected areas in Boot Top which has been power tooled and made ready.

Entire Hull flats and vertical sides is Silicone Paint so yard to apoply A/F only to the affected areas treated

Allow 15 % of the total area of Boot Top

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
BB-017-08	Shipyard Supply Costs		lump sum	No

Short Description :

Blowing Off Air

Long Description :

Quote Lumpsome air blow incase of blasting is done

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
BB-017-09	Shipyard Supply Costs		sq.mtr	No

Short Description :

Hydrojetting at 30,000 PSI

Long Description :

estimated area: 125 square meters.

The mechanically damaged area to be hydro-jetted and squared off. Edges preparation to be done accordingly.

The grit blasting should be fully avoided as the paint is silicone pain.

yard to quote for labor, material, hydro-jetting/sq.mtr, staging, lighting, ventilation for the job

Decision to carry out hydro-jetting or Mechanical De-scaling of the boot top will be taken by owners

BB-018 Blasting/Cleaning and Painting of Main Deck Frames

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
BB-018-01	Shipyard Supply Costs		sq.mtr	No

Short Description :

Main Deck P & S manifold across pipes/brackets

Long Description :

Yard to quote for the following:

- 1. Removal of chemical drums from manifold area (Around xxx drums)*
- 2. Removal of all gratings 200 pcs (Dimension: xxx cm x xxx cm)*
- 3. To carry out spot hydro-jetting (estimated 40%) @ 30,000 psi on the P & S from frames xxx-xxx(include under manifold areas), supports and pipes across*
- 4. Apply 3 X T/U + 1 X Stripe Coat and 2X F/C for all frames, supports, pipelines and brackets in frames. Paints Owners Supply. Paint to be applied by spray only*
- 3. Staging, ventilation, lighting, labor, hot work for the job.*
- 4. Steel renewal, if any, comes after hydro-jetting is extra*

Steel work if generates out of this job will be quoted extra

Estimated xxxx sq.mtr

BB-019 Underbridge wings on both port and stbd side to derust and paint.

DD : STEEL RENEWAL

DD-001 Steel Plates Renewals

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
DD-001-01	Shipyards Supply Costs		Per Kilogram	No

Short Description :

Steel plates renewal on main deck / hull

Long Description :

Quote per Kg cost for the plates renewal

Note:

- 1. Allow for the access lighting and staging.*
- 2. The welding procedures and material to be class approved.*
- 3. Certificate of material to be submitted to the class.*

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
DD-001-02	Shipyards Supply Costs		Per Kilogram	No

Short Description :

Stainless Steel Claded steel plate renewal

Long Description :

Quote /Kilogram of the stainless steel plate renewal on deck

The cost should include;

Note:

- 1. The welding should be done as per the class approved procedures.*
- 2. The weld repair to include proper grinding to remove the fracture and to be confirmed by the class and vessel supdt.*
- 3. Use of welding rods to be as per the material requirement for SS316 L/LN or SS304L/LN.*
- 4. Appropriate to the material, the tools like grinding discs and wire brush to be used.*
- 5. Welder to be class approved for the Clad steel and certificate to be submitted to the vessel supdt.*
- 6. Allow for access lighting and staging.*

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
DD-001-03	Shipyards Supply Costs		Per Kilogram	No

Short Description :

Renewal of 316L/LN plates in internal cargo tanks construction.

Long Description :

Quote /Kilogram of the stainless steel plate renewal inside the tank.

The cost should include;

Note:

- 1. The welding should be done as per the class approved procedures.*
- 2. The weld repair to include proper grinding to remove the fracture and to be confirmed by the class and vessel supdt.*
- 3. Use of welding rods to be as per the material requirement for SS316 L/LN or SS304L/LN.*
- 4. Appropriate to the material, the tools like grinding discs and wire brush to be used.*
- 5. Welder to be class approved for the Clad steel and certificate to be submitted to the vessel supdt.*
- 6. Allow for access lighting and staging.*

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
DD-001-04	Shipyards Supply Costs		Per Kilogram	No

Short Description :

Steel Plate renewal in ballast tanks.

Long Description :

Quote per Kg cost for the steel renewal.

Note:

1. Allow for the access lighting and staging.
2. The welding procedures and material to be class approved.
3. Certificate of material to be submitted to the class.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
DD-001-06	Shipyard Supply Costs			No

Short Description :

Steel plate renewal in cargo holds (bulk / container vessels)

Long Description :

Quote per Kg cost for the steel renewal.

1. for stiffeners
2. for tank top
3. for cell guides

Note:

1. Allow for the access lighting and staging.
2. The welding procedures and material to be class approved.
3. Certificate of material to be submitted to the class.

DD-002 Thickness gauging

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
DD-002-01	Shipyard Supply Costs		each	No

Short Description :

Thickness gauging

Long Description :

Yard to arrange for class approved thickness gauging company to carry out thickness gauging for hull plates , deck plates & ballast tanks internals.

Note:

1. Allow for the access lighting, ventilation and staging.

DD-005 Cargo tanks pitting on tank top

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
DD-005-01	Shipyard Supply Costs		Per spot	No

Short Description :

Cargo tanks top pitting repair

Long Description :

The cost should include;

Note:

1. The welding should be done as per the class approved procedures.
2. The weld repair to include proper grinding to remove the fracture and to be confirmed by the class and vessel supdt.
3. Use of welding rods to be as per the material requirement for SS316 L/LN or SS304L/LN.
4. Appropriate to the material, the tools like grinding discs and wire brush to be used.
5. Welder to be class approved for the Clad steel and certificate to be submitted to the vessel supdt .
6. Allow for access lighting and staging.

EE : BALLAST TANK REPAIRS

EE-001

Ballast Tanks

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
EE-001-01	Shipyard Supply Costs		Per ton	No

Short Description :

Removal of mud and corrosion scales

Long Description :

Quote for mud/ tonne disposed.

Note:

1. Ballast tanks to be opened and drained, ventilation and essential safety services to be provided.
2. Ballast tanks to be inspected and mud inside to be disposed off.
3. Provide access lighting & required staging.
4. Enclosed space entry permit to be provided.
5. Equipment and tools required to be provided.
6. Arrangement to dispose off from ship to shore to be included.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
EE-001-02	Shipyard Supply Costs		Per Pc	No

Short Description :

Installation of Anodes

Long Description :

Quote for per anode installation.

Note:

1. Ballast tanks to be opened and drained, ventilation and essential safety services to be provided.
2. Provide access lighting & required staging.
3. Enclosed space entry permit /Hot work permit to be provided.
4. Equipment and tools required to be provided.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
EE-001-03	Shipyard Supply Costs		Per Line/Valve	No

Short Description :

Pressure testing of Ballast tank lines and valves

Long Description :

Double bottom ballast tank pipelines/Valves are to be pressure tested to 5 bar.

Provide;

1. Safe access lighting.
2. ventilation inside the tanks.
3. Staging if required.
4. All safety precautions as required including the enclosed space entry permit and safety watch.
5. Provide required tools and equipment as required for accomplishing the job.

Quote;

1. Per line & per Valve.
2. For estimation purpose allow for 6 lines and 6 valves.

Note: The ballast tank access cover to be removed ashore and

	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	EE-001-04	Shipyard Supply Costs			No
Short Description : Ballast tank paint coating Long Description : All Ballast tanks coating up-gradation as per CAP requirement. Yard to quote for the below 2 options OPTION 1: Yard to quote for: 1. labor for ballast tank up-gradation 2. Stagings as per required 3. HP Washing of the residues from the Ballast tanks with 200 Bar pressure. 3. Hydro jetting of the frames required for up-gradation with 1000 bar water pressure 4. Manual chipping of the frames 5. Application of paint (2 X T/U , 1 X F/C) OPTION 2: Yard to quote for: 1. labor for ballast tank up-gradation 2. Stagings as per required 3. HP Washing of the residues from the Ballast tanks with 200 Bar pressure. 3. Sand Blasting of the tank frames 4. Use of Humidifier 5. Manual chipping of the frames 6. Cleaning of the sand blasted areas 5. Application of paint (2 X T/U , 1 X F/C) Area for up-gradation tank wise is to be done as per the specified SOR attached All paints supplied by Owners. Yard to quote for application only					
	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair

FF : SHIP SIDE SEA WATER VALVES, SEA CHEST AND HULL ANODES

FF-001 Shipside Valves, Sea Chests and Hull Anodes

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
FF-001-01	Shipyard Supply Costs		Per Valve	No

Short Description :

Ship Side valves overhaul

Long Description :

Quote for the overhaul of the below mentioned valves.

1. Machinery Space

2. Pump Room

3. In Forecastle store/Fore Peak/Fwd cofferdam.

Prior opening, the required valves to be confirmed by ship staff and marked by yard.

Sea suction and overboard discharge valves to be opened up, cleaned, overhauled.

Interior of the valve housing to be coated with apexior paint before assembling.

Supdt/Chief Engineer to check and confirm before coating.

1. Quote/valve.

2. Total cost for all the valves.

This should include renewal of joints, packings, nuts and bolts.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
FF-001-02	Shipyard Supply Costs		Per set	No

Short Description :

Sea Chests & Gratings.

Long Description :

1. Quote / set of sea chest / Grating/zinc anodes

2. Total cost based on below information

Yard to provide labour, necessary tools and material to accomplish the following works.

Access staging , lighting and ventilation to include in the cost

Following sea chest gratings to be removed. Gratings and interior of sea chests to be thoroughly scraped, cleaned and hosed down with high pressure fresh water. Rusty areas in the sea chest to be grit blasted. Sea chests and gratings then to be painted.

Quotation should include erecting and dismantling of necessary staging required for the job.

Location	Type	Dimension	Number of sets
i High Sea Chest
ii Low Sea Chest
iii Ballast Sea Chest
iv Emergency Fire Pump
v Pumproom sea chest

Allowed for a total of(..... pcs) zinc anodes to be renewed.

Yard to crop off and renew anodes.

Size:(.....Kg each) - Bolted/Welded

All anodes yard to supply.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
FF-001-03	Shipyard Supply Costs		Per Pc	No

Short Description :

Hull Anodes Renewal

Long Description :

Total number of anodes to renew.....

Size of the anodes.....

Rubber gaskets to renew.....

Renew bolts in case bolted type..... (Bolts to be yard supply)

Bolts specs to be provided: Stainless steel

Remove old /damaged bolts and weld the new bolts.

For Welded type: To remove /clean the old weld and install new anodes by welding.

1. Quote /Piece renewal of the anodes.

2. Total cost based on the total numbers renewed.

Note:

1. The quote should include removal of existing bolts and disposal of old anodes.

2. Allow for the access staging, lighting, labour, material, equipment, craneage, Cherry Picker and necessary accessory works.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair

GG-001-02	Shipyard Supply Costs		sq sm	No

Short Description :

Propeller blades repairs

Long Description :

Quote for blade repairs with filling the pits belzona.

Quote to be per sq.cm

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-001-03	Shipyard Supply Costs			No

Short Description :

Carry out Dye pen test of hub and blade tips

Long Description :

After the polishing of the propeller, the dye pen test of the hub and blade tips should be carried out.

This should be checked and confirmed by the vessel supdt.

GG-002 Propeller shaft Wear down

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-002-01	Shipyard Supply Costs		Lumpsum	No

Short Description :

Propeller shaft wear down measurement.

Long Description :

Provide labour material, equipment, tools, staging, access lighting, crange, cherry picker and necessary accessory work to carry out the below job;

1. As soon as the vessel is dry,rig staging, remove rope guard and tailshaft wear down readings to be taken.

2. Record the readings and report to the owners.

3. The Wear down gauge will be ship supply.

4. Upon completion,marine growth in way to be removed,areas to be cleaned and painted(Including rope guards), rope guards to be installed in good order and remove staging.

5. Inner seals are to be charged with fresh oil and plugs secured. This is to be witnessed by Chief Engineer and supdt.

GG-003 Intermediate Shaft Bearing

	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	GG-003-01	Shipyard Supply Costs		Lumpsum	No
Short Description : intermediate shaft bearing survey Long Description : Removal of top cover to facilitate the inspection by class and owners' representative . Unit to be boxed back after survey by class and owners. Bearing clearances are to be recorded before and after survey. Bearing loading is to be checked and confirmed prior and after inspection, results are to be presented to class as required.					

GG-004 Sterntube Sealing (Oil Lubricated)

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-004-01	Shipyard Supply Costs		Lumpsum	No

Short Description :

Withdrawal of Propeller, Tailshaft /Intermediate shaft

Long Description :

Price to include all necessary removal /reinstallation of propeller and staging for access, include all removals in the engine room floor plates pipe work etc.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-004-03	Shipyard Supply Costs		Per Pc	No

Short Description :

Temperature sensors to be checked and calliberated.

Long Description :

While the tail end shaft is out, the temperature sensors to be checked and calliberated.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-004-04	Shipyard Supply Costs		Per set	No

Short Description :

Chrome Liner Skimming

Long Description :

Quote for the skimming of chrome liners.
There are total two sets of chrome liners.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-004-05	Shipyard Supply Costs		Per time	No

Short Description :

Propeller shaft taper end magna flux test

Long Description :

Quote for the magna flux test of the taper end of the propeller shaft.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-004-06	Shipyard Supply Costs		Per time	No

Short Description :

Load test of Intermediate shaft bearings

Long Description :

Quote for the load test of the intermediate shaft bearings

	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	GG-004-07	Shipyard Supply Costs		Lumpsum	No
Short Description : Propeller hub to be filled up with Tallow Long Description : Quote for the filling up of the tallow in the propeller hub					

GG-005 Sterntube Sealing (Water Lubricated)

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-005-01	Shipyard Supply Costs		Lumpsum	No

Short Description :

Withdrawal of the Propeller /Tail shaft/Intermediate shaft

Long Description :

Price to include all necessary removal /reinstallation of propeller and staging for access, include all removals in the engine room floor plates pipe work etc

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-005-02	Shipyard Supply Costs		Per set	No

Short Description :

Supply of one complete set of the Viton seals.

Long Description :

Yard to advise the cost to supply one complete set Viton seals for forward and aft stern tube assembly .

Type :

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-005-03	Shipyard Supply Costs		Per Pc	No

Short Description :

Checking and Calibration of the temperature sensors

Long Description :

Quote for the two temperature sensor is to be checked and calibrated type if fitted (.....)

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-005-04	Shipyard Supply Costs		Per time	No

Short Description :

Magnaflux test on the taper area

Long Description :

Quote for the magnaflux test of the taper area.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
GG-005-05	Shipyard Supply Costs		Per Pc	No

Short Description :

Low flow sea water alarm to be checked

Long Description :

Quote for checking of the alarm and repairing of the alarm on case to case basis.

GG-008 Rope guard removal & Refit

	Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
	GG-008-01	Shipyard Supply Costs		lump sum	No
Short Description : Rope guard removal & refit					
Long Description : <i>Yard to quote for removal (cutting) and refitting (welding) of the rope guard.</i>					

HH : RUDDER AND PINTLES, STEERING GEAR

HH-001 Tasks for Rudder & Pintles

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
HH-001-01	Shipyard Supply Costs		Per Time	No

Short Description :

Measure & Record Pintle Clearances.

Long Description :

Quote price :

1. Measure upper and lower pintle clearances.
2. Lifting up rudder and inspect rudder clearance
3. Removal and refitting of the access/Inspection plate.
4. Staging.

Measure and record pintle clearances. All findings to submit to Class Surveyor, Superintendent and Chief Engineer. Include removal and refitting of access 2 x (.....) mm.
The steel plates are to be removed from either side of the pintle and refitted on completion of taking readings.

While the cover plates are removed a 50mm diameter stainless steel inspection plug to be installed in way of the locking plates for the pintle. On top of the pintle a stainless steel pointer is to be installed in line with the small inspection plug.

The rudder upper bush clearance is to be recorded allow for removal of gland ring and sealing ring. These are to be installed once clearance's completed.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
HH-001-02	Shipyard Supply Costs		Per time	No

Short Description :

Rudder Plug

Long Description :

Quote for the removal of Rudder Plug. Drain and the plug to be refitted.
Carry out the air pressure test to be witnessed by the attending supdt.

HH-002 Steering gear Hydraulic Rams Type

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
HH-002-01	Shipyard Supply Costs		Each	No

Short Description :

Steering Gear Rams leakage

Long Description :

Quote for the renewal of the seals on the hydraulic cylinders.

HH-004 Rotary Vane Steering Gear

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
HH-004-01	Shipyard Supply Costs			No

Short Description :

Rotary Vane steering gear

Long Description :

To quote for;

1. check the stuffing box seal condition leakages
2. check the greasing points and grease pipes.

II : ANCHOR, CABLES, WINDLASS AND MOORING EQUIPMENT WINCH

II-002

Anchors and Cables

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-002-01	Shipyard Supply Costs		Lumpsum	No

Short Description :

High pressure blasting, calibration and re-marking of cables

Long Description :

Quote for;

The anchor and cables are to be ranged within the dry-dock for high pressure blasting, calibration and re-marking. Anchor connections are to be sighted and D-shackles checked. Anchor chain to be coated with fish oil yard supply. Anchors to blast and paint black.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-002-02	Shipyard Supply Costs		Per Chain	No

Short Description :

Anchor chains to change end to end

Long Description :

Quote:

Anchor chains are to be end for ended and the outermost shackle length is to be exchanged for the innermost shackle. The attachments to the bitter end are to be closely inspected and cleaned and if necessary dye penetrate checked. Shackle pins examined/renewed. The use of extensive heating for breaking of KENTER shackles is to be avoided. Allow for welding of 20 links / per anchor chain to be re-welded

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-002-03	Shipyard Supply Costs		Per Pc	No

Short Description :

High Pressure blasting and painting black of anchors

Long Description :

Quote:

Anchors are to be high pressure washed and visually inspected clearances are to be checked between anchor shank and flukes.

The anchor is to be supported and a hammer test of major components to be carried out. Flukes to be visually inspected and crack tested by dye penetrant. D-shackle pins to be inspected and end covers weld to be checked and dye penetrant tested. Repairs to be carried out as required. Clearances to be recorded between shank and anchor pins.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-002-04	Shipyard Supply Costs		Per ton	No

Short Description :

Chain Locker demucking /cleaning / Painting.

Long Description :

Chain locker to be pumped out and loose mud and scale removed allow for: 2 tons of mud and scale. Include any access and removal of lower chamber covers access, light and ventilation. Allow for spot blast and coating yard supply material /m2 of internal chain locker.

Quote/ton of water /mud disposal ashore.

Include staging, mobile crange, transportation from vessel and access lighting

Windlass Machinery

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-003-01	Shipyard Supply Costs		Per Pair	No

Short Description :

Windlass Port & stbd Brake Bands to renew

Long Description :

Quote

Brake Lining renewal with owners supply

Both port and starboard brake band to be renewed include removal of hinge pins and operating mechanisms, the FERODO brake band is to be removed and new FERODO is to be installed and the brake band re-assembled.

Brake drum to be de-scaled and machined if necessary.

Brake lining FERODO type plus securing bolts/nuts are to be yard supply.

FERODO (.....) .

Machine screw and nut (.....) .

Whilst the hinge pins for the brake band are removed these are to be checked and drilled and machined to confirm that the grease nipple installed for greasing purpose is clear and free from obstruction.

Allow for four pins per windlass brake.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-003-02	Shipyard Supply Costs		Per Pc	No

Short Description :

Steel bands to be welded on to the windlass/mooring winches brake drums

Long Description :

3 mm thickness stainless steel bands to be welded on to the brake drums of the windlass and mooring windlass.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-003-03	Shipyard Supply Costs		Per Pc	No

Short Description :

Gypsy wheels where require building up

Long Description :

Both port and starboard windlass gypsy wheels are heavily worn and require to built up with welding allow the snugs to be ground where bulged and then welding and final grinding.

Allow 12 man hours/windlass.

Quote for the welding build up on windlass gypsy wheels.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-003-04	Shipyard Supply Costs		Per Pc	No

Short Description :

Hydraulic motors oil seal renewal

Long Description :

Oil seals on both port and stbd motors to be removed and renewed.

Both the motors to be transported to workshop.

Old oil seals to be removed and new seals to fit.

Pinion bearings and shafts conditions to be inspected.

Motors to be replaced on inspection and tested in situ.

Note: Yard to ensure cleanliness of the hydraulic system at all the times.

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-003-06	Shipyard Supply Costs		Lumpsum cost	No
Short Description : Windlass Gypsy Wheel and Gear Inspection Long Description : < To be done on all vessel over 10 years of age> Both port and Stbd Anchor chain Gypsy wheel and gear assy to be lifted up and shifted to Yard workshop for inspection and repair. The complete bedplate support structure of the Chain cable lifter(Gypsy) to be grit or hydro blasted , all support members examined for corrosion and wastage and renewed as required. After repair the complete structure to be coated with 3 coat of Owners supplied epoxy paint. The Gypsy wheel and gear to be examined and if required the worn face of the Gypsy to be built up welding with hard faced welding electrode and ground to required profile. Shaft and split bearing to be examined and bearing bush to be replaced if found worn out. Shaft surface to be polished if found scored or uneven. On Completion the Gypsy and gear assy to be assembled in place, bearing bush and gear teeth adequately greased and operation tried out. Gear wheel protection cover to be inspected and renewed as necessary. Please quote lumpsum cost for above job per Gypsy drum assy.				

II-004 Mooring Winches

Job Code	Cost Category	Bid Qty	Unit Name	Outside Repair
II-004-01	Shipyard Supply Costs		Per set	No

Short Description :

Renewal of the mooring winches brake bands

Long Description :

The brake bands are to be renewed with new FERODO and locating nuts, the steel backing plates are heavily wasted and will require to be renewed in entirety however the operating rods and gear are to be re-used.

Four mooring winch bands on forecandle, four main deck and four on poop deck.

Total of (.....) sets of brake bands.

FERODO is (.....) mm thick.

Brass nuts / bolts (.....) sets.

1. Quote for per set renewal.

2. Total cost .
