Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent

Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary.

Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.

Sizes of blocks and spacing to be mentioned on the drawing.

For first (haul-in) days

For each additional lay day

Estimated days X cost each day

Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent
 Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary. Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.
 Sizes of blocks and spacing to be mentioned on the drawing.

For first (haul-in) days

For each additional lay day

Estimated days X cost each day

Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent
Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary. Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.
Sizes of blocks and spacing to be mentioned on the drawing.

For first (haul-in) days

For each additional lay day

Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent
 Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary. Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.
 Sizes of blocks and spacing to be mentioned on the drawing.

For first (haul-in) days

For each additional lay day

Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent
 Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary. Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.
 Sizes of blocks and spacing to be mentioned on the drawing.

For first (haul-in) days

For each additional lay day

Estimated days X cost each day

Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent
 Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary. Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.
 Sizes of blocks and spacing to be mentioned on the drawing.

Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent
 Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary. Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.
 Sizes of blocks and spacing to be mentioned on the drawing.

For first (haul-in) days

For each additional lay day

Estimated days X cost each day

Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent
 Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary. Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.
 Sizes of blocks and spacing to be mentioned on the drawing.

For first (haul-in) days

For each additional lay day

Estimated days X cost each day

Short Description :

UPDATED : Docking / undocking incl. tugs, mooring, and pilot as well as first 2 days in dock, dock rent
 Dry-dock the vessel as required for a thorough examination, cleaning, painting and all specified repairs to the underwater body.

Upon the satisfactory completion of all work and with the approval of the Owner's Repair Inspector , undock the vessel. Prior to dock, the disposition of all fuel, fresh water and ballast water to be checked and recorded with the Captain and the docking trim to be agreed upon. Similar precautions are to be taken prior to flooding dock on completion. The vessel to be docked and undocked without assistance of vessel's main engine and properly shore lash in dry-dock. Keel blocks with soft wood caps to be spaced not less than one (1) meter between centers, except in way of forward and after ends of ship, and with a minimum headroom of one and a half (1.5) meters, in order to properly clean and apply paint to the hull between blocks.

Special shores are to be placed under all tanks containing fuel oil, fresh water or ballast water if found necessary. Vessel is to remain in dock sufficient time to permit all paint to dry , as directed by Owner's Representative.

The vessel will require a total of _____ running days in dry-dock for the completion of all underwater work as specified in this repair specification.

Yard to submit a drawing showing how the blocks were arranged in dock in relation to ships flat bottom and frames for owner's reference to next dry-docking and bottom painting.
 Sizes of blocks and spacing to be mentioned on the drawing.

For first (haul-in) days

For each additional lay day

Estimated days X cost each day
